Diane,

I sent this to David. We need to know if Region 6 can accept these.

If not -- we will have the contractor find a contract laboratory.

Subject: Ethylene Glycol analysis

David,

Would Region 6 be able to analyze for ethylene glycol for Dimock?

We anticipate sampling next week (Jan 23-27, 2012) -- and expect between 10-20 samples. They want quick preliminary results of 5 days and final report in 21 days.

Based on preliminary results -- we may get 20 samples per week. Possibly up to 70 samples.

Do you have a request form that needs to be completed?
